

# Does your business have a surveillance system?

**The Crime Prevention Centre, in partnership with the RCMP, are requesting and assisting businesses and residents to register their surveillance systems with CAPTURE.**

## CAPTURE stands for “Community Assisted Policing Through Use of Recorded Evidence”

This is a camera and video surveillance registry. THE RCMP DO NOT HAVE ACCESS TO YOUR SYSTEM. This registry shows them where registered surveillance systems are located and how to contact the business or resident so they can **request** to see the footage your system has captured.

It is FREE to register your surveillance system. The footage your system captures will give the police more “eyes on the street” and can potentially help with their investigations.

The registration form is online at [www.reddeercapture.ca](http://www.reddeercapture.ca) and can be completed in a couple of minutes.

Or if you prefer, the Crime Prevention Centre will come to your business or residence to complete the online registration form with you. Contact us at 403-986-9904 or [CPL1@cacpc.ca](mailto:CPL1@cacpc.ca) to arrange a time.
